

irrigation districts for the reclamation and irrigation of arid lands for agricultural purposes to the same extent and upon like terms as are privately owned lands within the district. This includes the right of the district to levy and collect taxes on unpatented land for the purpose of raising funds with a view to the construction, operation, and maintenance of the irrigation system, but does not grant the right to tax generally or for any purpose not definitely connected with the construction and maintenance of the irrigation works. The right of the district to sell lands which were entered at the date of the levy of any such lawful tax or assessment remaining unpaid is also provided for, together with the right of individuals to make entry of such land after the period of redemption from tax sales has expired.

§ 2781.1 Procedures.

§ 2781.1-1 Application by a district for approval.

Any irrigation district desiring to obtain the benefits of the Act of August 11, 1916, should file in the proper office for the district within which the lands are situated an application, in duplicate, consisting of the following:

(a) A statement setting forth concisely the legal address of the district; the date when, by court decree or otherwise, it was finally declared to be fully organized; the name and title of all officers of the district qualified at the date of the filing of the application; the gross amount of land embraced in the district; the amount of irrigable land within the district; the amount of privately owned land within the district; the amount of entered land for which final certificate has not issued; the amount of unentered public land; the amount of land embraced within a withdrawal for a United States reclamation project; the amount of land otherwise withdrawn (within Indian, forest, power-site, or other withdrawal); how much (percent) of the project has been completed; what bond issue, if any, has been finally consummated, and the present bonded debt; whether contract has been made with the United States under the Reclamation Act of June 17, 1902 (32

Stat. 388; 43 U.S.C. 372 *et seq.*), or is pending; and if any such, the date thereof; and any other facts or circumstances which would throw light on or be pertinent to a full understanding of the present condition or future prospects of the district.

(b) Proof of organization.

(c) Evidence of water right and sufficiency of available water supply.

(d) Maps showing the project.

(e) Plans and specifications.

(f) Such data as may be necessary to a full understanding of the situation.

(g) All applications by State irrigation districts for approval under the Act of August 11, 1916, must be accompanied by an application service fee of \$10 which will not be returnable.

§ 2781.1-2 Proof of organization.

A properly authenticated copy in duplicate of the proceedings through which the district claims corporate existence should be filed. The character of this proof will, of course, depend upon the State statute under which the organization was effected.

§ 2781.1-3 Evidence of water right.

If the lands to be reclaimed are wholly withdrawn lands within a United States reclamation project, and the right to the use of the water depends solely upon an appropriation by the Government, no evidence of water right will be required; but if dependence is placed upon any water appropriation other than one claimed by the Government, either for the reclamation of the whole or a portion of the lands sought to be made subject to the Act of August 11, 1916, certified copies of such instruments as will show title to the water rights claimed should be filed with the application. A statement as to whether the stream or other body of water from which the water supply is to be secured has been adjudicated, and if so, the court in which the decree was granted and the date thereof, should be given. If water measurements have not been taken, a detailed report showing the foundation for the belief that sufficient water exists should be filed.
